

ADOPT A HYDRANT

The City of Russell maintains fire hydrants throughout the city. Fire hydrants are located on every block and sometimes in between blocks depending on distance. It is important that fire hydrants are maintained, cleaned, painted, cleared of weed, debris, and a 3-foot circumference from snow. Please either describe or sketch your design proposal on the back of this form.

Responsibilities of the adopting individual, property owner, or organization:

- Weed-eat around the fire hydrant weekly or as needed
- Keep a 3-foot radius around the fire hydrant clear of snow, weeds, and any other debris that may block firefighters view of the hydrant
- Paint the hydrant annually or as needed. Paint colors and designs must be approved by the Fire Chief before painting
- Person painting the hydrant are responsible for the brushes and paint when not painting the barrel of the hydrant red
- Person painting the hydrant will not paint the bonnet or top of the hydrant, this is the responsibility of the fire department to correctly identify flow rates on hydrants.
- No political advertisements, nudity, suggestive or foul language will be allowed.

The fire department will maintain the responsibility of:

- Ensuring that the fire hydrant is operational
- Provide red paint and brushes ONLY when the hydrant barrel will be painted red without any other design.
